

IN THE SPECIFICATION

Please replace the paragraph beginning on line 23 of page 6 of the specification with the following amended paragraph:

Figures 10A-10C show data on the expression of heterodimers of IGF1R and various Her receptors in frozen samples from human breast tissue. Two out of the twelve breast tumors assayed expressed Her1-IGF-1R (Figure 10A), Her2-IGF-1R (Figure 10B), and Her3-IGF-1R heterodimers (Figure 10C). The lines in each figure panel show the trend between receptor heterodimer quantity measured and amount of lysate assayed for the two breast tumor samples that were positive for the indicated heterodimers. Square-shaped data points represent tumor sample 1 and diamond-shaped data points represent tumor sample 2.
